 **GroupProjectApi/src/main/java/s3_gps_ivanti/business/impl/CreatorServiceImpl.java**  0 → 100644

```
1 + package s3_gps_ivanti.business.impl;
2 +
3 + import s3_gps_ivanti.business.CreatorService;
4 + import s3_gps_ivanti.model.Creator;
5 + import s3_gps_ivanti.repository.CreatorRepository;
6 +
7 + public class CreatorServiceImpl implements CreatorService {
8 +     private final CreatorRepository repository;
9 +
10 +     public CreatorServiceImpl(CreatorRepository repository){
```

Kluijtmans,Lars L. @l461266 · 2 months ago

Maintainer ✓ 😊 ✎ ⋮

You don't need this constructor you can just add @RequiredArgsConstructor and make CreatorRepository a bean

Khan,Mohammad Nazibul M.N.K. @l464936 changed this line in [version 2 of the diff](#) 2 months ago · [Compare changes](#)

 **GroupProjectApi/src/main/java/s3_gps_ivanti/model/controller/ApplicationController.java** 

```
20 26 public class ApplicationController {
21 27
22 28     private final ApplicationService applicationService;
29 + private CreatorService creatorService;
30 + private CreatorRepository creatorRepository;
```

Kluijtmans,Lars L. @l461266 · 2 months ago

Maintainer ✓ 😊 ✎ ⋮

Controller is not connected to the repository layer, remove CreatorRepository.

 **GroupProjectApi/src/main/java/s3_gps_ivanti/model/Application.java** 

28	31	<code>this.icon = icon;</code>
29	32	<code>this.appLocation = appLocation;</code>
30	33	<code>screenshots = new ArrayList<String>();</code>
	34	<code>downloads = new ArrayList<>();</code>
	35	<code>}</code>
	36	<code></code>
	37	<code>public int totalDownloads(){</code>

 Kluijtmans,Lars L. @l461266 · 2 months ago

Maintainer    

Make TotalDownloads get the total downloads from the application table in database
